Objective

Computer Science graduate seeking a Junior Java Backend Developer position in Budapest, Debrecen, or remote; also open to SAP ABAP roles. Brings a solid Java/OOP foundation and hands-on Spring Boot and REST API experience from a software development internship. Enjoys turning complex data into clean, reliable backend logic, and is eager to grow through code reviews and structured on-the-job learning.

Skills and software proficiency

[PROGRAMMING]
Main technologies: Java, Spring Boot, Kotlin, Angular
Other: TypeScript, Python, C#, PHP, JavaScript, HTML, CSS

[SAP]
ABAP fundamentals: report programming, Open SQL queries (SELECT, JOINs), internal tables
SAP Data Dictionary basics, SAP GUI navigation

[DATA MANAGEMENT]
SQL, PostgreSQL, Excel

[TOOLS]
Git, Docker

[LANGUAGES]
English C1

Education

[2023] – [2026]
University of Debrecen - Faculty of Informatics
Bachelor of Science (BSc) - Computer Science

Work experience

[INTERNSHIP]
Software Developer Intern
University and National Library (DEENK)
Apr 2026 – Jun 2026 (320 hours)

- Developed a **Spring Boot** and **Angular** web application for DSpace SAF package generation.
- Implemented REST APIs, Excel processing, metadata mapping, and XML generation.
